

What are the differences before and after the quarrying?

Before quarrying	After Quarrying
More animals	Scarred landscape
No buildings	Spoil heaps
No quarried mountains	Road over mountain to serve quarry
No road over mountain	Tufa (calcium carbonate deposit) formed by rain water washing through spoil heaps.
	Butterworts and other plants growing in highly alkaline soil.
	Caves exposed by quarrying
	Building and kiln remains
	Fossils exposed
